FAQ

- Q: how to solve the problem that only one earphone can listen to music?

  A: put the two earphone back into charging box and close the cover, take them out again to check whether the binaural mode is restored, if the earphones have not recovered, you can clear the pairing information to solve the problem.

- Q: what should i do if the phone says "cannot connect"?

  A: delete the pairing record on the phone, and then search and connect again to solve it.
